![intellinetics — knowledge in motion™]

Intellinetics, Inc.

When 'charged' with managing your most critical, regulatory, and compliant Content[1] across your business, there is only one correct choice – that choice is **Intellinetics, Inc,** www.intellinetics.com. For over the past two decades, Intellinetics continues to be the trusted leader in State, Local Government, and Education Industries when managing your Enterprise Content.

Intellivue™ Solution Platform

Our flagship platform, Intellivue™, offers the industry's first and only all-inclusive turnkey Enterprise Content Management (ECM) solution that is affordable, easy to install, and deploy. Unlike the competition, Intellivue™ delivers a quicker 'time-to-value' in days versus the historical weeks, months, or years to roll-out.

Intellivue's™ advanced privacy technologies; viewing flexibility and access controls, which are critical to compliance and 'ease-of-use', are unprecedented in the public sector industry. From upfront capture and active workflow through long-term retention – Intellivue™ delivers a new benchmark in economic and operational impact.

Intellivue™ Offers:

- Low cost delivery model
- Rapid implementation
- Ease of use
- On-demand business solutions
- Immediate access to information
- Reduced storage requirements

Features

Flexible implementation
Intellivue™ offers flexible deployment options such as:
- Hosted
- Premise-based
- Cloud / SaaS

Advanced privacy technology - redaction
Allows you to "black out" sensitive content when the document is viewed, printed or shared. Provides both:
- User-controlled redaction
- Automated redaction

Viewing flexibility
- Customized indexing
- Dynamic search and retrieval of stored information
- Prevents lost or misfiles documents
- Supports indexing with barcodes
- Online viewing for collaboration
- 24x7 online access

Host system integration
Intellinetics technology easily links with your existing host business application to support:
- Dynamic database lookups
- Retrieval via DirectVUE™ one-touch technology

Work flow
Enables users to electronically:
- Review documents
- Conduct approvals
- Route content
- Assigning work task and states
- Enable audit trails

Records management
Helps users:
- Manage paper and electronic records through long-term archiving
- Automate document retention policies
- Ensure legal, regulatory and industry compliance

---

1. Content. Defined as unstructured data; for example: Word Documents, Excel Spreadsheets, PDFs, Images, J-PEG, Video Files, Audio Files, Fax.
